Cumulative Performance (gross of fees and expenses, since inception)

The data refers to past performance. Past performance does not predict future returns.

Performance: monthly Fund returns are based on the percentage change in the net asset value per share, after adjusting those values to include any reinvestment of dividends, interest and capital gain distributions. Monthly returns are linked geometrically to determine quarterly and annual returns. Gross returns are calculated by adjusting the monthly net return to exclude Administration, Trust and Custody fees. Fees would reduce the returns shown.

Standardised Performance: Performance figures are shown on a mid-to-mid basis, inclusive of any net reinvested income and net of the annual management charge and all other fund expenses. Net returns do not include any entry charge, which may be charged before your money is invested.

† Distribution Yield is calculated by dividing the distributions paid (yearly, monthly, etc.) by its cost or net asset value. Distribution yield can be used as a measure of investment cash flow provided by an investment relative to the cost paid for that investment.
